1.GENERAL SAFETY PRECAUTIONS

- After removing the cellar from the package, make sure it is in good condition. In case of doubt, do not use it and contact an authorized service center.
- Plastic bags, nails, etc. Should be kept out of the reach the operation manual carefully and check that the rating data on the rating nameplate corresponds to your power supply.
- The manufacturer will not respond for any damage due to improper use or repairs made by unqualified personnel.
- Before cleaning the cellar, make sure it is unplugged. Never clean the unit with an acid preparation, medical, dilution, gasoline, oil or any other kind of chemical substance that could damage the cellar.
- Repair should only be made by authorized service centers.
- This refrigerating appliance is not intended to be used as a built-in appliance

Caution

1. To reduce the risk of fire, replace only with same type fuse.
2. Danger: Risk of child entrapment. Before throwing away your old cellar, you should take off the door, and leave the shelves in place so that children may not easily climb inside.
3. If the supply cord is damaged it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

To find out more about your product, consult the online EPREL database. As defined in Commission Delegated Regulation (EU) 2019/2016, all information relating to this refrigeration appliance is available on the EPREL Base (European Product Database for energy labeling). This database enables you to consult the information and technical documentation of your refrigeration appliance. You can access the EPREL Database by scanning the QR code on the energy label of your appliance or by going directly to: www.ec.europa.eu and searching the reference of your refrigeration appliance.

Announced capacity

The advertised capacity is measured according to the EN62552 standard. This standard is calculated with 75cl traditional Bordeaux type bottles. Any other type of bottle format as well as the addition of shelves will considerably reduce the storage capacity. The maximum capacity is calculated with a defined number of shelves which vary according to the models.

3. OPERATION OF CELLAR

- The device turns on automatically as soon as it is plugged into a power source. To turn it off, unplug the device.
- Press the "1" button to turn the LED lighting on or off. The lighting switches off automatically after 10 minutes (energy saving).
- Press button "2" to set the desired display; in "° C" degrees Celsius or "F" for Fahrenheit.
- The "3" LCD screen allows you to view your settings information.
- To adjust the temperature, press buttons "4" and "5" on the device. The arrow pointing up increases the temperature of the device. The arrow pointing down decreases the temperature of the device

PLEASE NOTE: The temperature range is 11°C-18°C (± 2°C, ambient temperature at 25°C). The maximum difference between the temperature inside the cellar and the ambient temperature is 12°C.

4. PARTICULAR PRECAUTIONS

This appliance is indicated for operation in rooms with a very specific ambient temperature, this climatic class is indicated on the rating plate. The ambient temperature affects the interior temperature, the humidity of your cellar, and the operation of the compressor. Your device can operate in an ambient temperature between 5°C and 20°C. Outside of these limits, your device cannot guarantee normal operation and may cause breakdowns. For optimal operation and to achieve the desired performance, the device has been designed to operate at an ambient temperature between 20°C and 23°C. An ambient temperature above or below 20-23°C may affect the performance of the appliance in reaching the desired set temperature.

CLASSE	SYMBOLE	PLAGE DE TEMPÉRATURE AMBIANTE (°C)
Tempérée élargie	SN	De +10 à +32
Tempérée	N	De +16 à +32
Subtropicale	ST	De +16 à +38
Tropicale	T	De +16 à +43

The appliance's thermostat is electronic and allows you to set the temperature between 11 and 18 degrees. For storage, it is recommended that you set your appliance to 17 degrees. This temperature

can be adapted according to the type stored. Setting the temperature above 17 degrees will reduce the energy consumption of the appliance. Setting the temperature below 17 degrees will increase the energy consumption of the appliance.

- When the surrounding temperature is 25°C and the electric cooler has no bottle loaded, it will take around 30 minutes to increase the electric cooler's temperature from 11°C to 18°C.
- Under the same circumstance, it will take around one hour to decrease the electric cooler's temperature from 18°C to 11°C.

The appliance assures that temperature is maintained as long as it is in operation and that it is used in normal conditions of use.

The temperature inside the appliance and its energy consumption can be influenced by many factors: ambient temperature, exposure to the sun, number of door openings and quantity stored... Slight changes in temperature are perfectly normal.

5. CARE AND MAINTENANCE

Cleaning your thermoelectric cooler

Before cleaning your appliance (something that should be done regularly), disconnect it by removing the plug or by pulling the fuse on the circuit.

Before using your appliance for the first time and regularly after that, we recommend that you clean the inside and outside (front, sides and top) with warm water mixed with a gentle cleaning product. Rinse with clean water and allow to dry before reconnecting. Do not use solvents or abrasives.

In the event of a pronounced plastic smell, clean the appliance with a mixture of two tablespoons of bicarbonate of soda, mixed in a ¼ litre of lukewarm water.

When the appliance is switched on for the first time, there may be a residual odour. In that case, run the appliance empty for a few hours at the coldest possible temperature. The cold will kill any odours.

Moving your thermoelectric cooler

- Remove all the bottles.
- Securely tape down all loose items inside your thermoelectric cooler.
- Turn the leveling legs up to the base to avoid damage.
- Tape the door.
- Be sure the thermoelectric cooler stays in the upright position during transportation.

In case of power failure

Most power outages are resolved for a short period of time. A 1 or 2 hours shutdown will not affect the temperatures of your device. To protect your drinks during power outages, consider minimizing the number of door openings. For very long power cuts, take the necessary measures to protect your drinks.

In the event of a breakdown

Despite the care we take during production, a breakdown can never be totally ruled out. Before contacting your retailer's after-sales department, please check that:

- The appliance is properly plugged in
- There is not a power cut in progress
- The breakdown is not one of those described in the table at the end of this manual

IMPORTANT: if the power cable supplied is damaged, it must be replaced by the manufacturer, a service center approved by the brand or the retailer. In all events, it must be replaced by qualified personnel in order to avoid any risk of injury.

If these checks reveal nothing, then contact your retailer's After-Sales Department.

CAUTION!

Unplug the appliance before carrying out any maintenance or repair work.

6. TROUBLESHOOTING

You can solve many common cooler problems easily, saving you the cost of a possible service call. Try the suggestions below to see if you can solve the problem before calling the servicer.

PROBLEM	POSSIBLE CAUSE
Cooler does not operate	<ul style="list-style-type: none">▪ Not plugged in▪ The appliance is turned off▪ The circuit breaker tripped or a blown fuse
Cooler is not cold enough	<ul style="list-style-type: none">▪ Check the temperature control setting▪ The ambient temperature requires a temperature readjustment▪ External environment may require a higher setting▪ If the ambient temperature is > 25 ° C, your appliance can only cool down by 12.5°C below the ambient temperature.▪ The door is opened too often▪ The door is not closed completely▪ The door gasket does not seal properly
The light does not work	<ul style="list-style-type: none">▪ Not plugged in▪ The circuit breaker tripped or a blown fuse▪ The bulb has burned out▪ The light switch is "OFF": press the "light" button to activate the function▪ Contact you after sales service
The cooler seems to make too much noise	<ul style="list-style-type: none">▪ The rattling noise may come from the flow of the refrigerant, which is normal▪ As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in your cooler▪ Contraction and expansion of the inside walls may cause popping and crackling noises▪ The cooler is not level▪ Check that the shelves are correctly installed
The door will not close properly	<ul style="list-style-type: none">▪ The cooler is not level▪ The door was reversed and not properly installed▪ The gasket is dirty▪ The shelves are out of position
Vibrations	<ul style="list-style-type: none">▪ Check to assure that the cooler is level

The control board doesn't work	<ul style="list-style-type: none"> ▪ The control panel is down ▪ Problem with printed circuit boards ▪ Problem with power supply ▪ Contact your after sales service
Display error on screen	<ul style="list-style-type: none"> ▪ Poor screen quality ▪ Temperature value does not appear ▪ Contact your after sales service

Replacing light

This appliance consists of light-emitting diodes (LEDs). This type of diode cannot be changed by the consumer. The lifetime of these LEDs is normally sufficient for no change to be made. If however, and despite all the care taken during the manufacture of your wine cellar, the LEDs were defective, please contact your after-sales service for any intervention.

If you have any questions, please call authorized services center.

7. ENVIRONMENT

This appliance is marked according to the European directive 2019/290/UE on Waste Electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

The symbol on the product, or on the documents accompanying the product, the Crossed Out Wheeled Bin, indicates that this appliance may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment, or, if you are buying an equivalent product, to the retailer of the new product.

The user is responsible for taking the appliance to the appropriate collection center at the end of its useful life. Selective and appropriate collection for the recycling of no longer used appliances and their disposal and destruction in an environmentally friendly manner, helps to prevent potential negative effects on the environment and health, and encourages the recycling of materials used to make the product.

For more detailed information about treatment, recovery and recycling of this product, please contact your local authority, your household waste disposal service or the retailer where you purchased the product.

8. WARNING

As we continuously improve our products for the benefit of our customers, we reserve the right to modify technical characteristics without notice.

Warranties for LA SOMMELIERE brand products are offered exclusively by selected retailers. No part of these instructions may be considered as a supplementary guarantee.

FRIO ENTREPRISE cannot be held liable for errors or technical or editorial omissions in this document. Non-binding document.
